நீரிழிவு நோய்

சர்க்கரை நோய் சாபம் அல்ல

நீரிழிவு நோய் (சர்க்கரை நோய்) என்றால் என்ன? அதற்கு ஏன் இவ்வளவு முக்கியத்துவம் தருகிறோம்?

சர்க்கரை நோய் என்பது வாழ்க்கை முறை மாற்றதால் வரக்கூடிய ஒரு நோய். இரத்தத்தில் உள்ள சர்க்கரையின் அளவு ஒரு குறிப்பிட்ட அளவுக்கு மேல் சென்றால், அந்த நபருக்கு சர்க்கரை நோய் உள்ளது என்று கூறுவோம்.

சர்க்கரை நோய் வருவதற்கான காரணங்கள் நாம் அறிந்ததே:

- அதிக உடல் பருமன்.
- ஆரோக்கியமற்ற உணவு பழக்கங்கள்.
- உடற்பயிற்சி இல்லாத வாழ்க்கை முறை.
- நடுத்தர மற்றும் முதிர்ந்த வயது.
- குடும்ப உறுப்பினர்களில் சர்க்கரை நோய்.

சர்க்கரை நோயின் பொதுவான அறிகுறிகளை இப்போது காண்போம்:

- > அதிக முறை சிறுநீர் கழித்தல்.
- > அளவுக்கு அதிகமான தாகம்.
- > அளவுக்கு அதிகமான பசி.
- > எடை குறைதல்.
- > சோர்வு.
- > மெதுவாக ஆறும் காயம்.

குணப்படுத்துவது சாத்தியமே

சர்க்கரை நோய் கட்டுப்பாட்டில் இல்லாவிடில் ஏற்படும் உடல்நல பாதிப்புகள் :

- இதயம் - மாரடைப்பு, இதயத்தில் இருந்து குறைந்த இரத்த வெளியோட்டம்.
- சிறுநீரகம் செயலிழத்தல்.
- நரம்பு மண்டலம் - மரத்துபோதல், உணர்ச்சி இல்லாமை, விறைப்பு செயலின்மை, பக்கவாதம்.
- கண் பார்வை இழப்பு.
- நரம்பு பாதிப்பு மற்றும் இரத்த ஓட்டம் குறைவதால் ஆறாத புண் - விரல் அல்லது கால் இழக்கும் நிலை.

கவனிப்பு வழிமுறைகள்

1. உங்கள் இரத்த சர்க்கரை அளவை பரிசோதித்தல் இரத்தத்தில் சர்க்கரை இருக்க வேண்டிய அளவு

பரிசோதனை நேரம்	இரத்த சர்க்கரை அளவு
காலை உணவுக்கு முன்பு	125mg/dl அளவுக்குள்
உணவுக்கு பின்பு (2 மணி நேரம் கழித்து)	180mg/dl அளவுக்குள்

2. போதுமான உணவு கட்டுப்பாடு

சப்பாத்தி, தானியங்கள், நார் சத்து உள்ள உணவுகள் (6-11 அளவுகள்)

காய் மற்றும் சர்க்கரை அளவு கம்மியாக உள்ள பழங்கள் (3-5 வேளை)

பால், தயிர் (2-4 வேளை), ஒரு நாளைக்கு 4-6 அவுன்ஸுடன் பல வேளையாக பிரித்து

எண்ணெய், கொழுப்பு, இனிப்பு (ஒரு வாரத்துக்கு 1-2 வேளை)

3. வயதுக்கு ஏற்ற உடற்பயிற்சி

- வழக்கமான உடற்பயிற்சி மிகவும் அவசியம். தினமும் குறைந்தது 30-45 நிமிடங்கள் நடற்பயிற்சி மேற்கொள்ளுதல் சர்க்கரை நோயை கட்டுப்படுத்த உதவும்.
- வெளியே செல்ல முடியாத நபர்கள், தங்கள் வீட்டுக்குள் உடற்பயிற்சி செய்யலாம்.

4. பாதபராமரிப்பு

- காலணி இல்லாமல் வெளியில் செல்லக்கூடாது.
- தினம் பாதங்களை வெந்நீரில் நன்கு தேய்த்து கழுவவேண்டும்.
- காலில் சிறு காயம் ஏற்பட்டால் உங்கள் மருத்துவரை உடனடியாக அணுகவேண்டும்.

5. மருந்து மற்றும் இன்கலின் ஊசி

சர்க்கரை நோயினால் ஏற்படும் பாதிப்புகளை தடுக்க மருந்துகளை ஒரு வேளைகூட தவறாமல் எடுக்க வேண்டும். வெளியூர் சென்றாலும் மருந்துகளை தவறாமல் எடுக்க வேண்டும். மருத்துவர் அனுமதி இன்றி மருந்துகளின் அளவை மாற்ற கூடாது.

இரத்த சர்க்கரை மிக அதிகமாக இருந்தால், இன்கலின் ஊசி தேவைப்படலாம் இது உயிர் காக்கும் மருந்து. ஆகவே தினமும் தகுந்த அளவு ஊசி போட்டுக்கொள்ள வேண்டும்.

சர்க்கரை நோயினால் வரும் விளைவுகளைத் தடுப்பதில் அதிக கவனம் செலுத்த வேண்டும்.

3 மாதத்துக்கு ஒரு முறை

- ✓ சர்க்கரை அளவு பரிசோதித்தல்
- ✓ இரத்த அழுத்தம் அளவு பரிசோதித்தல்

ஒரு வருடத்துக்கு ஒரு முறை

- ✓ சிறுநீரில் புரதம் பரிசோதித்தல் வேண்டும்.
- ✓ கண் பரிசோதனை.
- ✓ காலில் இரத்த ஓட்டம் பரிசோதித்தல்.

குறைந்த இரத்த சர்க்கரை அளவின் அறிகுறிகள்:

- > உடல் நடுக்கம் / கை நடுக்கம்
- > உடற்சோர்வு
- > படபடப்பு
- > அதிக வியர்வை/ அதிக பசி
- > தலை சுற்றல்
- > கண் இருட்டுதல்

இந்த அறிகுறிகள் ஏற்பட்டால், உடனடியாக உணவை உண்ணவேண்டும் அல்லது பழச்சாறு பருகவேண்டும்.

இரத்த சர்க்கரை அளவை பரிசோதிக்கவும்.

இந்த அறிகுறிகள் அடிக்கடி ஏற்பட்டால், மருத்துவரை அணுகவும்.

வெளியில் செல்லும் பொழுது சாக்லேட், பிஸ்கட் அல்லது உணவை எடுத்து செல்லவும்.

Department of Transfusion Medicine
Porur, Chennai- 600116

12.07.2022

To

Prof. Dr. Anitha Rani, Department of Community medicine

NSS Coordinator, SRIHER

Respected Madam,

Reg: Voluntary Blood donation by NSS students, SRIHER on 11.07.2022

Greetings on behalf of the department of Transfusion medicine, SRMC & R.I

With reference to the above, we sincerely thank you for coordinating the blood donation by NSS students of SRIHER on 11.07.2022. Ten NSS volunteers donated blood on that day. This was immensely helpful to provide transfusion support for a trauma patient at our hospital.

Thanks to all the donors for their noble gesture of saving lives through blood donation.

Looking forward to your continued support in this regard.

Yours sincerely,

Dr.R. KRISHNAMOORTHY, MD.,

National Service Scheme,
Sri Ramachandra Institute of Higher Education and Research (DU)

Madam,

On behalf of the Management, Staff and Students of Don Bosco Matriculation School, M.K.B.Nagar ***we thank the entire team*** of Ramachandra Institute of Medical College and hospital for **conducting Medical camp on Tuesday 30th August, 2022.**

Our children were benefitted through this programme. The lecture given for Std. 8, 9 and 10 were really useful.

Thank you once again.

Yours faithfully,

K. Saramma

Chennai - 600116

Respected Madam,

We ought to thank you for donating on 16.09.2022 Rs 31238 worth sports items which are very costly with good quality. Our school students are lucky and God gifted children. The Donors are really God to us. Our school students are very happy on seeing all the sports items. We have won many prizes in different fields like Essay writing, oratorical Competition, Drawing, Dance, Story writing Science Exhibition etc at Thiruvallur District Level getting prizes from our collector and our Educational Director Mr. Kannappan for Science Exhibition.

Cont. - P.T.O -

But we have not yet concentrate on sports Events because of no play ground, no PET Teacher and no playing Materials. But now We assure you Madam that our students in future will share in sports Events also. We Teachers are also happy on seeing all the things especially First Aid Box and Weighing Machine. We find no words to express our Gratitude to you all who help us in donating this much costly sports items. We Thank you all on behalf of our school.

Thank you. Madam

Vayalanallur.

16.09.22.

Camp information

August

1. Hearing screening camp

On 4 th of August, 2022; Services to REach children with Speech and Hearing disorders using Tele-practice (SRESHT) Lab, Sri Ramachandra Institute of Higher Education and Research conducted a Hearing Screening Camp program in Balwadi school, Irumbulicher village, Thirukazhukundram Block.

Approximately 20 children of age range (10 months to 5 years) were screened for pure tone threshold, Speech Awareness Threshold and Otoacoustic emissions. Consent was obtained from the parents of the children and the testing was started immediately.

Observations:

Total No. of children screened for OAE: 19

Total No. of pass results: 11

Total No. of referred results: 4

Four children could not be screened for OAE as they were not cooperative.

For children who got a refer, follow up was recommended post ENT consultation during the next camp visit.

With being able to do mobile audiological evaluations using above instruments, there were many challenges to tackle for successful administration of the tests on the patients. Due to excessive background noise and lack of rooms, we were unable to perform the pure tone threshold estimation for majority of the children. Only kids above 4 years were screened for threshold estimation. It was quite difficult to obtain OAE responses, but we managed to perform tests as quickly as possible. One of the major issues that came into notice was the vocabulary among the children that was reduced compared to children of that specific age range. Due to this, the findings of SAT and SRT might be less reliable.

2. Cleft camp - 20 th August, 2022

Transforming Faces- SRIHER

Transforming Faces- SRIHER conducted a multi-disciplinary Cleft Review Camp program in Arcot Hospital, Cuddalore on 20 th of August, 2022; from 10:30 a.m. to 2:30 p.m.

22 children of age range 3 years to 18 years were screened for speech and hearing. Speech Language Pathologist, Audiologist, Pedodontists and Orthodontists were the team members in the multidisciplinary mode of service delivery.

The camp provided us opportunity to learn how various professionals can provide intervention to the patient in a multidisciplinary set up. The treatment plan were discussed among the professionals along with Community Based Rehabilitation workers to provide optimal healthcare facilities to the patient.

Activities performed:

Audiology Evaluations:

Total No. of children reviewed for pure tone audiometry- 6 Children

All of them had normal hearing sensitivity except for 2 children with history of bilateral Minimal Hearing Loss.

Total No. of children screened for Immittance- 22 Children

Total No. of pass results: 14 Children

Total No. of referred results: 8 Children revealed 'B' type tympanogram, either unilaterally or bilaterally.

For children who got a refer, follow up was recommended post ENT consultation during the next camp visit.

Speech and Resonance Evaluation:

Total No. of Children reviewed: 22 Children

Total No. of Children who required Camp Based Therapy: 19 Children

Total No. of Children who were recommended for visit to SRIHER for documentation and recordings: 10 Children

15 minutes of therapy was taken for 2 children, where home based activities were demonstrated.

3. Camp - 24 th August, 2022 (SRESHT Lab)

Multidisciplinary Team approach:

We had an opportunity, for the first time to see and understand how Speech Language Pathologist, Audiologist, Pedodontist and Orthodontist come together after doing their individual evaluations, to review and counsel the patients in a multidisciplinary mode. All the professionals discussed about the patient's current status and how to further proceed with the intervention process.

Apart from clinical experiences, I also learnt how Transforming Faces at SRIHER functions in offering help for individuals with Cleft, and how it is different from Smile Train organization.

I also learnt how Community-based rehabilitation (CBR) programmes support people with disabilities in attaining their highest possible level of health, working across five key areas: health promotion, prevention, medical care, rehabilitation and assistive devices. This also helped me understand the role of Community Based Rehabilitation

September

1. Hearing Screening Camp -

27th September, 2022

Sri Ramachandra Institute Of Higher Education And Research
Porur, Chennai - 116

On 26th and 27th September, 2022 a hearing screening camp was conducted in G-Block of the hospital for all the staff and workers from SRIHER. 2 Audiologists were appointed to run this screening for the workers from 1 - 4pm. A total of 54 staff were assessed on that particular day of screening.

We did hearing screening for the workers using the ELKON Audiometer by checking their AC thresholds in the main frequencies (500Hz, 1Khz, 2Khz and 4Khz) and based on the results obtained we wrote their classification of hearing along with a recommendation. For workers with over Mild hearing loss, detailed hearing check up was recommended and for the staff who are exposed to noise on a daily basis during their work, usage of ear protective devices like ear muffs or ear plugs were recommended.

October

To be added ... (SMR)

November

1. NSS CAMP - GOVT MIDDLE SCHOOL AT PARIVAKKAM

DATE: 17/11/2022

BENEFICIARIES:165

Aspects worked on:

A multidisciplinary health camp was organized at parivakkam for over 165 children aged between 6-12 years of age. The children were provided with pediatric, otorhinolaryngology, dental and audiological services and were given recommendations. Audiologists performed a hearing screening test along with speech screening to find if there any abnormalities. Hearing screening test revealed "REFER" for about 25 children (reasons may include impacted cerumen, accumulation of wax) where the children were referred for a detailed hearing assessment and "PASS" for

the rest of the children. Hearing screening was performed with the help of MAICO handheld audiometer and ELCON audiometer where puretones were presented at 1kHz, 2kHz, and 4kHz and the child was asked to respond accordingly. The cut-off point that was set was 50dBHL with respect to the environmental sounds.

December

1. Cleft camp

An interdisciplinary cleft care camp for individuals with Cleft Lip and/or Palate under the Transforming Faces program was organized on 3rd December, 2022 at Thirukazhukundram, Kanchipuram- 603405. The camp was conducted by Sri Ramachandra Cleft & Craniofacial center focused on ensuring care to remote & rural communities.

The camp started at 10:30 a.m. with the help of an orthodontist and Speech Language Pathologist addressing the needs of the patients. Cleft recording was done for children between 3 to 14 years of age using the recording protocol (both audio & video recording) and appropriate recommendations were provided. Patients were counseled on the interventions that are available like Speech & Language therapy and surgical intervention. Follow up for instrumental assessment (Nasoendoscopy) at SRMC was recommended for few children. Parents of children with CLP were emphasized on the importance of early identification & intervention and also the potential problems of the condition. The camp concluded at 2:00 p.m. with the Doctors, Speech Pathologists, and students being thanked for the active participation.

Outreach activity

1. Museum of possibilities ‘

Tactile games and Enablers

Glasses for people with low vision

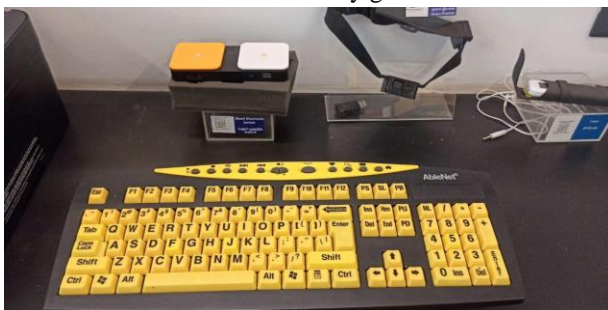

AAC devices for people with communication difficulties i.e. High tech, Mid-tech, Low tech

Wheelchair for people with locomotor disability

Sensory garden

Keyboard for people with low-vision

MOBILE CARDIAC UNIT

- We have started a mass cardiac health screening camps using a state of art Air conditioned Bus donated by Rotary club of central Aditya which housed two Echocardiogram and two Electrocardiogram machine on 02.03.2022.
- This bus will be going to Rural areas of various parts of Tamil Nadu to screen patients for Cardiac Illness and do Echocardiogram and ECG at free of cost.

BATTLE CELLS

Researchers zero in on a special type of RNA to combat cancer

Chennai researchers identify a micro-RNA that kills breast cancer cells by weakening their defence against debilitating oxidation

M RAMESH

A certain type of RNA (ribonucleic acid, which is present in our body cells and regulates how genes produce various proteins) is being looked at closely for a cancer cure.

Among the several types of RNAs, the micro-RNA, or miRNA, influences how genes make proteins. In other words, miRNA can kill a cell or help it proliferate. (miRNA is different from mRNA, or messenger RNA, which has been in the news recently as a coronavirus vaccine.)

"Altering miRNA levels in cancer cells has promising potential as a therapeutic intervention," says a 2020 paper published in the National Library of Medicine of the US government.

So, the miRNA has created a buzz among medical biotechnologists for its cancer fighting role. It works for sure, but there are hurdles, such as stability and how to deliver it into the body.

There is ongoing research to find out which miRNA works best for which type of cancer, how to make it and how to deliver it into the body. This approach to cancer therapy gains even more importance when compared with conventional cancer

therapies such as chemo, radiation and surgery, which end up killing the good cells of the body, too.

Now, researchers from two institutions in Chennai have reported a breakthrough. Prof Karunakaran Devarajan of the department of biotechnology, IIT-Madras, and Dr Sandhya Sundaram, pathologist, and Dr Ganesh Venkatraman of the department of human genetics, faculty of biomedical sciences, at Sri Ramachandra Medical College and Research Institute, have reported successfully using a particular miRNA for treating breast cancer.

In this cancer, especially among Indian women, a protein called SLC7A11 gets over-produced in the cancer cells. The traditional way of treating this is to use drugs such as sulfasalazine to inhibit the production of this protein. In the latest development, the researchers have identified an miRNA, called miR-5096, as the one that is effective against breast cancer.

miR-5096 was found to induce cell death by suppressing the SLC7A11 protein. "This is the first time miR-5096 has been studied and used to target SLC7A11 in breast cancer cells. The cell death occurs by a process known as ferroptosis," says an article on the IIT-M website.

How it works

- As in any cell, the cell wall (membrane) of the cancerous cell is made up of lipids (fatty acids) and proteins.
- The lipids are prone to get oxidised (like iron rusting), which is bad; but there is a defence mechanism — anti-oxidants — in the cell that prevents lipids from oxidising.
- But if iron accumulates within the cell, the anti-oxidants are busy neutralising the iron, leaving the lipids of the cell walls defenceless.
- A protein called SLC7A11 prevents iron from accumulating in the cell. Like other proteins, it is produced by genes.
- RNAs in the cell regulate gene expression — the process by which genes make copies of proteins. The micro-RNA miR-5096 "down-regulates" or lowers the production of the SLC7A11 protein.
- With not enough SLC7A11, iron accumulates within the cell, which exhausts the defending capacity of the anti-oxidants, leaving the lipids in the cell walls open to external oxidation (lipid peroxidation). The lipids "rust away", the cell wall collapses, and the cancer cell dies. This method of killing a cell is called ferroptosis.

Ferroptosis is a way of killing cells (programmed cell death) that was discovered a decade ago, where cells die when iron accumulates inside them. Now, iron means rust, and the anti-oxidants in the body fight this rust: This way, the accumulated iron uses up all the anti-oxidants in the cell, leaving the cell membrane defenceless against the oxidation that happens naturally. Cell membranes are made up of lipids and proteins. The lipids get oxidised (called lipid

peroxidation) and the cell membrane collapses, killing the cell.

The researchers demonstrated that miR-5096 targets and inhibits the production of the protein SLC7A11. This protein protects the cell from ferroptosis. When the miR-5096 inhibits the production of the protein, it leads to a pile-up of iron in the cells, ferroptosis, and, eventually, cell death. "The results of the study prove that miR-5096 can effectively kill breast cancer cells,"

says IIT-M, adding that they highlight the therapeutic potential of ferroptosis in breast cancer.

Dr Sundaram told *Quantum* that breast cancer was chosen to test the efficacy of miR-5096 because "this is the commonest form of cancer that I diagnose in my routine practice... the effectiveness in other cancer models has not been tested but further research may yield interesting results".

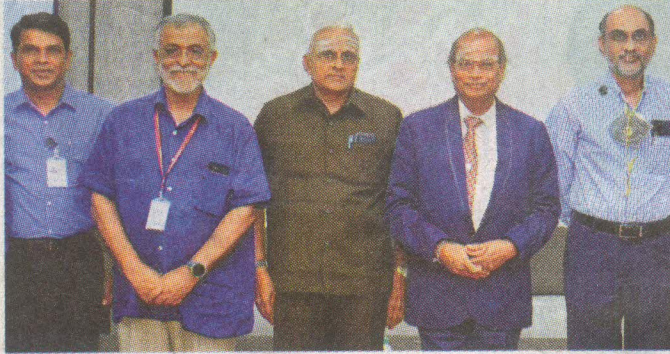

She said that to target SLC7A11, which protects breast cancer cells from ferroptotic cell death, "we used bio-informatic target prediction tools like TargetScan, miR-WALK, and got an indication that miR-5096 might target the protein SLC7A11". The micro-RNA is present in human cells and can be replicated in a lab, she said.

Currently, micro-RNAs have gone into pre-clinical trials; scientists are working with cancer in animals, but that disease is not an exact replica of the human disease, Dr Sundaram said. Further, cancer cells also use several pathological mechanisms to sustain, proliferate and evade treatments, she observed. However, the miR-5096 is a breakthrough; with validation in clinical trials, it can turn out to be an effective cancer cure.

SRIHER launches a unique certificate course

Sri Ramachandra Institute of Higher Education and Research launched a certificate course in health care finance in association with the Institute of Cost Accountants of India. The 50-hour course will be online and in class to suit the convenience of students. It is open to medical professionals, cost accountants, finance professionals and graduates. Dr Mahesh Vakamudi, chief operating officer of Sri Ramachandra Medical Centre and dean of Faculties; P Raju Iyer, president, Institute of Cost Accountants of India; Dr KC John, director, Sri Ramachandra Faculty of Management Sciences, addressed the gathering.

பேறு கால நலனில் மாசில்லா எரிவாயுவுக்கு முக்கியப் பங்கு

ஐசிஎம்ஆர் அறிவியலாளர் தாலிவால்

சென்னை, நவ. 7: பேறுகாலத்தில் பெண்கள் பயன்படுத்தும் சமையல் எரிவாயுவுக்கும், சுருவில் வளரும் குழந்தையின் நலனுக்கும் முக்கியத் தொடர்பு உள்ளதாக இந்திய மருத்துவ ஆராய்ச்சி கவுன்சிலின் தொற்றா நோய்கள் துறைத் தலைவர் டாக்டர் ஆர்.எஸ். தாலிவால் தெரிவித்தார்.

இந்தியா, கௌதமாலா, பெரு மற்றும் உருவாண்டா நாடுகளில் உள்ள கர்ப்பிணிகள் பாதுகாப்பான சமையல் எரிவாயு பயன்படுத்தும்போது அவர்களுக்கு பிறக்கும் குழந்தைகளின் நலன்களை ஆராயும் ஆய்வு முடிவுகள் வெளியீட்டு விழா போரூர் ஸ்ரீ ராமச்சந்திரா உயர்கல்வி மற்றும் ஆராய்ச்சி நிறுவனத்தில் திங்கள் கிழமை நடைபெற்றது.

ஸ்ரீ ராமச்சந்திரா உயர் கல்வி நிறுவனத்தின் வேந்தர் வி.ஆர். வெங்கடாசலம், துணைவேந்தர்

போரூர் ஸ்ரீ ராமச்சந்திரா மருத்துவ மையத்தில் திங்கள் கிழமை நடைபெற்ற நிகழ்ச்சியில் மறைந்த பேராசிரியர் கிரீக் ஸ்மித்தின் மனைவிக்கு நினைவுப் பரிசு வழங்கும் ஸ்ரீ ராமச்சந்திரா பல்கலைக்கழக வேந்தர் வி.ஆர்.வெங்கடாசலம், உடன் துணைவேந்தர் பி.வி.விஜயராகவன், ஐசிஎம்ஆர் தொற்றா நோய்த் தலைவர் டாக்டர் தாலிவால் உள்ளிட்டோர்.

பி.வி.விஜயராகவன் உள்ளிட்டோர் அதில் பங்கேற்றனர். அந்நிகழ்வில், டாக்டர் தாலிவால் பேசியதாவது:

பேறு காலத்தில் வீட்டுக்குள் ஏற்படும் மாசு மற்றும் புகையானது குழந்தையின் வளர்ச்சியை பாதிக்கும். அதையே இந்த ஆய்வு

முடிவுகள் அறிவுறுத்துகின்றன. அவர்களுக்கு திரவ சமையல் எரிவாயு வழங்கும்போது அத்தகைய பாதிப்புகள் தவிர்க்கப்படுகின்றன. பிரதமரின் உஜ்வாலா யோஜனா திட்டம் அதனை சாத்தியப்படுத்தியுள்ளது என்றார் அவர்.

CHENNAI DIGEST

**HAPIN trial results discussed at an event in SRIHER**

Speaking at an event at Sri Ramachandra Institute of Higher Education and Research, Dr RS Dhaliwal, head, Non Communicable Diseases, ICMR, said that the results of the household air pollution intervention trials (HAPIN) held in India, Guatemala, Peru and Rwanda on the impact of an 18-month LPG intervention on pregnant women will help in making improvements in the PM Ujwal Yojana scheme. Dr Thomas Clasen, Professor in Environmental Health of Emory University who headed the trials in Rwanda shared his experiences. Chancellor VR Venkatachalam, presented a scroll in honour of late Prof Kirk R Smith, a visiting professor in the department of environmental Health Engineering laid the foundation for HAPIN.

Multi-country LPG trial shows drop in air pollution exposures, but insignificant impact on birth weight

Exposure to household air pollution caused by the burning of solid biomass fuel during pregnancy is associated with adverse health outcomes, including low birth weight.

Consultant, Media Relations.

India Author Team Picture (L to R: Dr. Thangavel G, Dr. Sambandam S, Dr. Aravindalochanan V, Dr. Kalpana Balakrishnan, Dr. MukhoPadhyay K, Dr Sarada S Garg Dr. Puttaswamy, N). (Express Photo)

THE BIRTH weight of infants did not differ significantly between those born to women who used Liquefied Petroleum Gas (LPG) cook stoves, and those born to women who used biomass cook stoves, results from one of the largest multi-country trials have found. Published on Monday in the *New England Journal of Medicine*, the Household Air Pollution Intervention (HAPIN) trial assessed the impact of an 18-month LPG intervention on health in India, Guatemala, Peru, and Rwanda among 3,200 pregnant women and 200 older adult women.

“LPG intervention reduces air pollution exposures and these programmes have potential to make improvements in air pollution for rural populations in India to achieve future health gains. However, that alone cannot make a difference in birth outcomes among poor populations and multiple risk factors need to be addressed simultaneously,” Professor Kalpana Balakrishnan, Dean (Research) and Director of the ICMR Center for Advanced Research on Air Quality, Climate and Health at Sri Ramchandra Institute of Higher Education and Research (SRIHER), Chennai, and India team lead for the multi country study told *The Indian Express*.

Exposure to household air pollution caused by the burning of solid biomass fuel during pregnancy is associated with adverse health outcomes, including low birth weight. Low birth weight (<2500 g) remains a major public health challenge, particularly in low-income and middle-income countries. Whether the replacement of a biomass cook stove with a liquefied petroleum gas (LPG) cookstove would

result in an increase in birth weight is unclear. In India and many low- and middle-income countries are promoting liquefied petroleum gas (LPG) as an alternative source of energy for cooking and heating, in some cases subsidising the cost at considerable government costs.

Between May 7, 2018, and February 29, 2020, at least 3,200 pregnant women (9 to 20 weeks gestation)—800 each from India, Rwanda, Guatemala and Peru—were randomised on a 1:1 basis, either to receive a free LPG stove and fuel or to serve as controls that continued to cook on traditional stoves with biomass. “We measured stove use and the pregnant woman’s exposure to air pollution throughout the gestation period. In India, the trial was conducted in Kallakurichi and Nagapattinam districts of Tamil Nadu. Despite the challenge of Covid shutdowns and government restrictions—and the tendency of householders to continue to use traditional stoves and fuel even when they have access to cleaner fuels—we were able to continue the trial and achieve nearly exclusive use of the LPG stoves by the intervention arm throughout the follow up period,” Dr Balakrishnan said.

Personal exposure to fine particulate matter (PM 2.5) in the intervention group was consistently lower than the WHO Interim Guideline value of 35 $\mu\text{g}/\text{M}^3$. No other trial to date has been able to accomplish such consistent and sustained reductions across multiple countries. Despite the reduction in exposure to air pollution, the birth weight of infants did not differ significantly between those born to women who used LPG cookstoves and those born to women who used biomass cook stoves, study researchers from SRIHER said.

The study was led by Emory University, Johns Hopkins University, and Colorado State University in the US in collaboration with investigators from more than a dozen institutions and funded by the US National Institutes of Health and the Bill and Melinda Gates Foundation. Prof Thomas Clasen from Emory University, Atlanta, the main author of the study, Liquefied Petroleum Gas or Biomass for Cooking and Effects on Birth Weight, has noted in the report that the difference in birth weight of infants born to women in the intervention group and control group was just 19.5 g and not statistically significant.

While PM 2.5 exposures were significantly lower among the intervention group, they were still more than seven-fold higher than the recently issued WHO guideline values. Findings suggest that even lower levels may be needed to achieve benefits on birth weight. More than a third of the global population – about 3 billion people – rely on solid biomass (wood, charcoal, dung and agricultural residue) for cooking. The resulting household air pollution is a leading environmental risk factor, accounting for an estimated 2.3 million deaths annually (0.6 million deaths were attributable to household air pollution exposures in India in 2019).

There was suggestive evidence that intervening earlier in gestation may be protective: infants born to women who received the intervention at less than 18 weeks' gestation were 33.8 gm heavier than those born to women who received the intervention at a later time. This suggests the length of the intervention may not have been sufficient and it may be necessary to reduce exposures throughout pregnancy and perhaps even prior to conception. It is important to note that the study population in India had a higher than average prevalence of low birth weight pointing out to the need for addressing the role of multiple risk factors for low birth weight in poor populations while scoping intervention programmes, Dr Balakrishnan said.

LPG for cooking didn't improve weight of newborns, finds study

Pushpa.Narayan
@timesgroup.com

Chennai: A shift to LPG in energy poverty areas may not be enough to improve birthweight of infants though it can help reduce air pollution compared to use of conventional biomass cooking fuel such as wood or dung.

A multi-national study of more than 3,000 women found birthweight of infants – which reduces when pregnant women are exposed to air pollution induced by conventional cook stoves – didn't differ significantly between those born to women using LPG stoves and those born to women using biomass stoves. These women may require several health and nutritional intervention to improve birthweight, scientists said.

More than a third of the global population – about 3 billion people – rely on solid biomass for cooking, with the resulting household air pollution accounting for an estimated 2.3 million deaths annually (there were 0.6 million such deaths in India in 2019), said Dr Kalpana Balakrishnan, dean of research at Sri Ramachandra

NO BIG CHANGE IN OUTCOME

MORE THAN 3,000 WOMEN TOOK PART IN THE STUDY

Outcome	LPG stove users	Bio fuel gas users
PRIMARY OUTCOME		
Birth weight in grams	2,921±474.3	2,898±467.9
SECONDARY ANALYSES		
Low birth weight (no./total no. (%))	263/1,512 (17.4)	268/1,490 (18.0)
Very low birth weight (no./total no. (%))	8/1,512 (0.5)	6/1,490 (0.4)

Institute of Higher Studies who led the India team of the study, 'Liquefied Petroleum Gas or Biomass for Cooking and Effects on Birth Weight'.

It was published in New England Journal of Medicine on Monday.

The randomized, controlled trial involving 3,200 pregnant women between 18 and 35 years of age in 9 to 20 weeks gestation (as confirmed on ultrasonography) in Guatemala, India (Kallakurichi and Nagapattinam in TN), Peru and Rwanda showed that around half the women (1,593) used a free LPG stove (intervention group), while 1,607 used biomass stove (control group).

Stove use and the women's exposure to air pollution throughout the gestation period were measured to determine the impacts of a randomized LPG intervention on health in diverse lower/middle income populations on birthweight, child stunting, child pneumonia and adult systolic blood pressure, said corresponding author Thomas F Clasen of Emory University, US.

The results show weight measured within 24 hours of birth was one of the primary outcome for the report. The analysis will be released in a few months.

Results showed the median 24-hour personal ex-

posure to fine particulate matter was 23.9µg per cubic metre among people using LPG stoves and 70.7µg per cubic metre in the biomass stove group. "LPG stove was highly effective in reducing exposure to air pollution. Personal exposure to fine particulate matter (PM2.5) in this group was consistently lower than the WHO Interim Guideline value of 35µg/M3-IT1 limit, consistently and sustained across multiple countries," Dr Balakrishnan said.

Among valid birth available for 94.9% of infants born to women using LPG and 92.7% using biomass stove there was no significant difference in birthweight.

There is suggestive evidence that intervening earlier in gestation may be protection. "Infants born to women who received intervention at less than 18 weeks' gestation were 33.8 g heavier than those born to women who got it later. This suggests the length of the intervention may not have been sufficient and it may be necessary to reduce exposures throughout pregnancy and perhaps even prior to conception."

Survey: 7 in 10 kids in ICUs have traumatic brain injuries

TIMES NEWS NETWORK

Chennai: At least 7 out of 10 children with critical injuries admitted to paediatric emergency units have traumatic brain injuries, a quarter of them with severe grade injuries, according to the interim results of an ongoing study in Chennai and Bengaluru.

The study said 13% of kids required emergency neurosurgery, and 10% died during hospitalization.

The multi-centre observational study, **TRIP collaborative network study (Trauma Research in Paediatrics)**, on 260 critically-injured children was done by hospitals in Chennai and Bengaluru between July 2020 and September 2022. At least five hospitals in Chennai — Apollo Children's Hospital, Sri Ramachandra Medical Centre, SIMS Hospitals, Kanchi Kamkoti Childs Trust Hospital, and Institute of Child Health in Egmore — collabo-

rated with six hospitals in Bengaluru.

The results were released by paediatricians on 'World Trauma Day' to raise awareness and enhance safety regulations for children to prevent life-threatening injuries. "If only — are the two most painful words we hear in emergency rooms everyday," said Apollo hospital's paediatric intensivist Dr Indira Jayakumar, who is also the co-principal investigator of the study from Chennai.

"Not taking safety precautions, not anticipating danger, not childproofing homes, not rushing immediately to a specialised hospital can prove costly. Immediate aid by first responders, bystanders and ambulance teams in the platinum minutes can make a big difference to the outcome," she said.

The analysis showed that nearly 45% of children injured were under the age of five years and 20% were between 5 and 10 years. The most com-

mon cause for injury was road accidents and a fall from heights, while the spillage of hot liquids and electric shocks topped the list for burn injuries.

"All these are preventable accidents," said Dr Shrishu R. Kamath, senior consultant, PICU, SIMS Hospital. "Associations and building societies should ensure there are proper grills on balconies. Children must not enter kitchens and young kids should not be left alone," he said.

Despite grievous injuries, more than 40% of the children are ferried to the hospital by their own vehicles or in autos without medical supervision. On arrival, at least 16% of children required oxygen, and a nearly equal number of them had to be ventilated. "Look for stuff that could potentially harm your kid. Fix them at the earliest to make your home child safe," said Dr Priyavarthini V, consultant PICU Apollo Children's Hospital.

Breast cancer survivors meet

Chennai: A breast cancer survivors' meet was held at Sri Ramachandra Medical Centre on Wednesday. How survivors are successfully battling medical, psychological and social problems daily in return to normal life was discussed. Saaisha India Foundation, an NGO, which produces knitted breast prosthesis distributes them freely to patients jointly organised the event. Survivors can lead a near normal life if it is detected early and if they take up the challenge boldly. ENS

ராமச்சந்திரா மருத்துவமனையில் பக்கவாத நோயாளிகளுக்கு இலவச மருத்துவ ஆலோசனை

சென்னை, அக்.27-

பக்கவாத பாதிப்படைந்த மற்றும்
பிற நரம்பியல் நோய் அறிகுறிகள்
உள்ளவர்களுக்கான இலவச மருத்துவ
ஆலோசனை முகாம் ராமச்சந்திரா
மருத்துவமனை மறுவாழ்வு மையம்
சனிக்கிழமை (29ந் தேதி) நடத்துகிறது.

பக்கவாதத்திற்கு பின்
பேசுவதற்கு, விழுங்குவதற்கு,
நடப்பதற்கு, கேட்பதற்கு, அன்றாட
பணி செய்வதற்கு, ஞாபகம்
வைத்துக்கொள்ள, படிக்க, எழுத
சிரமப்படுவர்களும் பிற நரம்பியல்
நோய்கள் உள்ளவர்களும்
இம்முகாமில் கலந்து கொள்ளலாம்.

ராமச்சந்திரா மருத்துவ மையத்தின்
அவசர சிகிச்சை பிரிவுக்கு எதிரில்
உள்ள அனெக்ஸ் கட்டிடத்தின் முதல்
மாடியில் காலை 9 மணி முதல் மதியம்
3 மணி வரை முகாம் நடைபெறும்.

சிகிச்சை சார் படிவங்களை எடுத்து
வரவும். பதிவுக்கு 9940184280 / 044

நவீன கருவி அறிமுகம்

போரூர் ராமச்சந்திரா மருத்துவ மையத்தில் காது, மூக்கு, தொண்டை, தலை மற்றும் கழுத்து அறுவை சிகிச்சை துறையில், அதிநவீன தொழில் நுட்ப 'லேசர்' குறு அறுவை சிகிச்சை கருவி அறிமுகப்படுத்தப்பட்டு உள்ளது.

இதற்கான மையத்தை, ராமச்சந்திரா உயர்கல்வி மற்றும் ஆராய்ச்சி நிறுவன இணைவேந்தர் செங்குட்டுவன் துவக்கி வைத்தார்.

நிகழ்வில் 'ஜி3' நிறுவன தலைவர் சுரேஷ் பேசுகையில், "கடந்த 40 ஆண்டுகளாக அமெரிக்க, ஐரோப்பிய நாடுகளில் இருந்து தான், இதுபோன்ற கருவிகளை இறக்குமதி செய்து வருகிறோம். தற்போது, சென்னை அம்பத்தூர் தொழிற்பேட்டையில் இந்த கருவி உருவாக்கப்பட்டுள்ளது," என்றார்.

ராமச்சந்திரா காது, மூக்கு, தொண்டை, தலை மற்றும் கழுத்து அறுவை சிகிச்சை துறை தலைவர் சோமு பேசுகையில், "இந்த குறு அறுவை சிகிச்சை கருவியின் வாயிலாக, பாதிக்கப்பட்ட பகுதிகளில் மட்டும், மிக துல்லியமாக அறுவை சிகிச்சை செய்ய முடியும். இதனால் ரத்தப் போக்கும், அறுவை சிகிச்சைக்கு தேவையான பொருட்களும் மிகவும் குறைவாக இருக்கும்," என்றார்.

நிகழ்வில், துணைவேந்தர் விஜயராகவன், மருத்துவ இயக்குனர் சதாசுரன் உள்ளிட்டோர் பங்கேற்றனர்.

7-month-old girl chokes on seed, saved

Chennai: A seven-month-old girl, struggling for breath, was brought to the emergency room of Sri Ramachandra Medical Centre on Monday by her mother, a daily wage worker from Nerkundram. Enquiries and tests showed that the child was choking on bean seed. It blocked the airway and oxygen levels had dropped to 40%. In less than 30 minutes, the baby was taken to the operation theatre and doctors removed the seed from the windpipe through bronchoscopy, said pediatric surgeon Dr Prakash Agarwal. "Children below 4 years should not be given cereals and nuts in full form because their body is not habituated to chewing and swallowing them properly," he said. A release from the hospital said the treatment was done free of cost. TNN
